9 December 1974

STATINTL MEMORANDUM FOR:

OC ADP Systems Administration
Office of Communications

SUBJECT : Memorandum, OC-M-74-624, dated 5 November 1974
"Partitioned Access to the OC
Personnel Data Base (COMCON)"

The options available for the required security implementation
are as follows:

1. File redesign of the COMCON Data Base at a Particular level of segmentation (e.g. Career Panel). This is the most feasible method of segmentation, and can be accomplished by us.

2. Centralization of Data Base control by an organization (i.e. Admin) designated by you, to control the dissemination of personnel information to the O/C suborganizations.

Option 1 implies an additional programming effort, of approximately four to six weeks duration, at an estimated cost of $7,500 including machine costs. Option 2 requires no additional effort, and can be organized by your office.
